FOS and scienceOS form partnership

Both parties collaborate to support communities in conserving nature.

The Global FOS Collective and Dresden, Germany: Today, Foundations of Success (FOS) announced a new partnership with scienceOS. This collaboration offers FOS and its members a preferred pricing scheme for the AI research tool scienceOS and supports scienceOS with access to structured user feedback.

"ScienceOS enables us to ground conservation decisions in the best available evidence, making strategy design more effective," says Nick Salafsky Executive Director at Foundations of Success. "By integrating scienceOS into the adaptive management processes and tools that we support, we empower conservation practitioners with ready access to the major source of evidence they need for smarter conservation management."

"Collaboration is central to both FOS and scienceOS," says Henri Max Deda, CEO and Co-Founder of scienceOS. "Partnering with FOS empowers us to contribute to nature conservation and work together toward a more sustainable society."

The benefits of this new partnership include:

- Preferred pricing scheme for members of FOS
- Seminar for FOS members on how to benefit from using scienceOS in research
- Access to user feedback for scienceOS

About FOS: FOS amplifies the collective impact of the global conservation community by providing practitioners with the skills and tools needed to be more effective and efficient in their efforts to foster thriving ecosystems, conserve natural resources, and advance human well-being.

About scienceOS: ScienceOS is an AI research tool to streamline workflows with access to over 220 million trusted papers, offering answers with citations and supporting PDF uploads - all in one simple science AI chat.
